Amazon Web Services, Inc.

The symposium, co-hosted by Institute of Industrial Science (IIS) of The University of Tokyo and The University of Tokyo New York Office, aims to bring together leading researchers and specialists from the US and Japan to explore and advance our insights into today's emerging topics in integrating virtual/physical agents and spatial description systems.

The evening will feature keynote speeches by researchers from IIS on their cutting-edge research in applying game engines to "Common Ground" to facilitate interactions between agents and spatial systems, followed by discussions with panelists from academia and industry in the US on the latest topics from related fields.

Pre-registration is required
